Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 December 2005.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3731

1. The indicated allowability of claim 39 is withdrawn in view of the newly discovered reference(s) to Berg et al. (6,074,416). Rejections based on the newly cited reference(s) follow.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 38, 40, 41 and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Berg et al. (6,074,416). Berg et al. disclose a stent-graft including a body having a first end, a second end and a middle segment, a plurality of polymeric strips (col. 4, lines 39-49, member 40, 44 with polymeric coating) circumferentially spaced from each other around the body of the stent-graft and the stent-graft being coated with drug (col. 3, line 65 to col. 4, line 6).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3731

6. Claims 38, 40-43 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Berg et al. '416. Although, Berg et al. discloses the frame including wires (40, 44) being made from nitinol and coated with polymeric material, Berg suggest the frame can be made from polymeric material (col. 3, lines 40-52) and teach that the nitinol wire need to be coated with polymeric material to reduce abrasion of body organ (col. 4, lines 39-49). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to made the wires/strips of Berg et al.'s device from polymeric material in order to reduce abrasion of body organ.

Regarding to claims 41-42, the bioabsorbable materials as claimed are well known material in the art for making endovascular implant so that to reduce an extra procedure for removing the implant after the treatment. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make Berg et al.'s device from bioabsorbable materials as claimed in order to reduce an extra procedure for removing the implant after the treatment.

Conclusion

7. Applicant's amendment filed 2/22/05 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3731

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
